

CIRCUIT BREAKER SALES NE Inc.

A Group CBS Company

**New, Surplus, Reconditioned, and Remanufactured Power Distribution Equipment and Replacement Parts
Shop Repair, Retrofit, Retrofill, Life-Extension Services | On-site Emergency/Disaster Repair and Recovery Services**

A LEADER IN PROVIDING power distribution products and services, **Circuit Breaker Sales NE Inc.**, formerly Diversified Electrical Services, Inc., has been serving commercial, industrial, municipal, and utility customers in the Northeast and mid-Atlantic for more than 22 years.

Based in Seymour, Connecticut, CBS Northeast has a large inventory of new, surplus, and reconditioned circuit breakers, switchgear, motor controls, transformers, and other power apparatus, along with hundreds of thousands of replacement parts.

Our shop services include repairing, upgrading, reconditioning, and remanufacturing your electrical equipment from a single circuit breaker to a complete substation.

Life extension is our specialty, and our engineering staff and skilled technicians can match your existing lineup or retrofit, or retrofill your circuit breakers and switchgear with upgraded components or modern replacements.

CBS Northeast service teams provide on-site 24/7 emergency or disaster repair/recovery services. We can repair on-site or replace your circuit breakers, switchgear, and power transformers and have you back online quickly and safely.

Also available from CBS Northeast are electrical equipment shelters, replacement vacuum interrupters, circuit breaker and MCC bucket remote racking systems, remote switch actuators/operators, circuit breaker timers, and the industry's only field-portable vacuum interrupter tester which predicts the usable life of a vacuum interrupter.

EQUIPMENT

- **Circuit Breakers**
- **Switchgear**
- **Motor Controls and Contactors**
- **Load-Break Switches**
- **Protective Relays**
- **Power Transformers**
- **Renewal and Replacement Parts**
- **Electrical Equipment Shelters**
- **Remote Racking and Switching Systems**
- **Unit Substations**
- **Vacuum Interrupters**

SHOP & FIELD SERVICES

SHOP SERVICES

CBS Northeast is an electrical equipment and service provider focused on keeping its industrial, commercial, and utility customers running at full capacity through an extensive inventory of new and remanufactured power apparatus and replacement parts; life extension, retrofit, retrofill, and upgrade shop services; and emergency field services.

Life Extension

CBS Northeast's life-extension programs will extend the useful life of your obsolete or underrated, hard-to-maintain switchgear, motor controls, and circuit breakers. Our capabilities include raising interrupting capacity, increasing equipment reliability, and providing solid-state trip units, all while matching your existing switchgear lineup. By upgrading the insulation and contact-making or breaking circuit breaker architecture, CBS Northeast can add useful life to aging power systems.

Retrofit

Retrofit is taking an obsolete or underrated piece of equipment and using it as a base; and then adding modern or updated components to affect a change that makes the old equipment more suitable for the application. Retrofitting electrical equipment with new solid-state controls, protective relays, and modern instrumentation can improve equipment performance and ensure that your switchgear can be supported for many more years to come.

Retrofill

Retrofill is stripping out the old obsolete or underrated equipment and installing a complete new assembly, a draw-out structure with a new breaker or contactor, or an all-new assembly.

Remanufacturing/Reconditioning/Repair

Depending on our customers' equipment needs, CBS Northeast provides a range of remanufacturing, reconditioning, and repair services for all types of electrical equipment. Our remanufacturing services include the disassembly, visual and mechanical evaluation, component replacement or reconditioning, testing both before and after the remanufacturing process, all standard maintenance procedures as dictated by the OEM, and full documentation of test results and equipment performance after the remanufacturing process is completed. This ensures that your equipment will perform as well or better than it did when it rolled off the assembly line.

FIELD SERVICES

On-site 24/7 Emergency/Disaster Repair Service

When an emergency or disaster strikes, CBS Northeast can provide immediate on-site response 24 hours a day, seven days a week. We have dedicated employees, an engineering-based staff, complete manufacturing facilities including sheet metal machining capability, self-contained mobile workshops, and a huge inventory of all manufacturers' obsolete, surplus, and new electrical equipment and replacement parts. We can repair on-site or replace your faulty electrical equipment, enabling us to restore your power quickly and safely.
